

Malhiot – Breath Testing and the Intoxilyzer 8000 Video Notes

By Garrett M. Berman, Assistant State Attorney, 17th Judicial Circuit

- 5:45
 - FDLE has statutory responsibility of ensuring reliability of the forensic breath analysis
 - If it's bad, and there's a Brady issue, we will let you know.
- 6:08
 - We audit every single breath test
 - If there's a bad breath test we will let you know
 - If there's a bad agency inspection, we will let the agency know
 - So there are no secrets
- 7:05
 - BTOs are actually forensic breath analysts
- 13:20
 - How DUI enforcement goes, follow the money
 - NJ took money away from DUI defense there, so it's a lot easier now
 - Florida there is too much money to be made
- 20:35
 - Time, volume and slope
 - One second of breath turns on electronics of the instrument
- 22:50
 - Volume
 - Where does 1.1 liters of breath appear in Fla. Stat.?
 - Vehicle registrations; if do not have 1.1 liters of air in lung, you are eligible for handicap license
- 23:37
 - Slope is most important
 - Can do away with other two and just have slope
- 26:00
 - I-8000 does diagnostics and checks itself
